

Updates to Rabies Exposure Vaccine Series

To optimize throughput, after initial Rabies exposure and treatment in the ED, patients will be scheduled and receive subsequent doses in the Injection Clinic.

- Please instruct patients to come to the Injection clinic for follow-up vaccine doses
- There is only 1 **injection Clinic**: (where flu and Covid vaccines are currently given)
 1. TKC Injection Clinic- on the 2nd floor of TKC.
- The Rabies powerplan has been updated to include:
 - A new name **Rabies Immune Globulin and Vaccines** *Right click to Add as a Favorite
 - The **Post ED follow-up order** to help schedule injection appointments
 - A wound care order is available if simple wound management is needed
 - Also, the quantity and timing of vaccine days varies for patients with previous rabies exposure and compromised immunity, review reference notes in the powerplan

DO NOT Initiate Now- only Injection Clinic Staff should select Initiate No

The screenshot shows a detailed view of a medical order for 'Rabies Immune Globulin and Vaccines, Day 0 Rabies UED (Initiated Pending)'. The order includes several components and instructions:

- rabies immune globulin is for patients who:**
 - Have NOT previously received post exposure prophylaxis with rabies vaccine
 - NOR received a recommended IM pre-exposure series of rabies vaccine
 - NOR have a previously documented rabies antibody titer considered adequate
- rabies immune globulin, human:** 20 int-unit(s)/kg, Inj, Infiltrate, Once, NOW. Do not mix in-syringe with vaccine, give as close to puncture site as possible.
- VACCINE ORDERS:**
 - Initial (DAY 0) vaccine order: rabies vaccine, purified chick embryo cell (RabAvert) (rabies vaccine, purified chick embryo cell) 1 mL, Inj, IM, Once, NOW.
 - NOTE: The pre-selected Post ED scheduling order and vaccine regimen is for a NON-immunosuppressed patient (doses on DAYS 0, 3, 7, 14).
 - If patient has been vaccinated before, remove DAYS 7 and 14 vaccine orders and change Post ED Follow Up to schedule patient for DAYS 0, 3.
 - If patient is IMMUNOSUPPRESSED, add the DAY 28 vaccine order and change the Post ED Follow Up order to schedule patient for DAYS 0, 3, 7, 14, 28.
 - If NOT immunosuppressed (doses DAYS 0, 3, 7, 14)
- Post ED Follow-Up:** Other Use Special Instructions, Rabies Exposure, Less than 7 day Priority, Schedule Rabies Follow UP treatment at the Injection Clinic for Days 3, 7, and 14.
- Previously Vaccinated Persons (doses on DAYS 0, 3):** Other Use Special Instructions, Rabies Exposure, Less than 7 day Priority, Schedule Rabies Follow UP treatment at the Injection Clinic for Days 3.
- IMMUNOSUPPRESSED (doses DAYS 0, 3, 7, 14, 28):** Other Use Special Instructions, Rabies Exposure, Less than 7 day Priority, Schedule Rabies Follow UP treatment at the Injection Clinic for Days 3, 7, 14, and 28.
- Initiate Order Set/Powerplan:** Rabies Immune Globulin and Vaccines, Initiate the next Rabies Day when patient arrives to clinic for indicated therapy.
- Rabies Immune Globulin and Vaccines, Day 3 Rabies Injection Clinic (Planned Pending):** rabies vaccine, purified chick embryo cell (RabAvert) (rabies vaccine, purified chick embryo cell) 1 mL, Inj, IM, Once, NOW.
- Wound Care:** rabies vaccine, purified chick embryo cell (RabAvert) (rabies vaccine, purified chick embryo cell) 1 mL, Inj, IM, Once, NOW.
