

1. Documentation Compliance: Procedural Sedation
2. Documentation Compliance: Restraints
3. Chart Signature Timeliness
4. Opiate Prescriptions > 12 Tabs
5. Critical Care Documentation for ESI 1 & ICU

Chart Timeliness

- **ATTENDING** signature should be on the chart **within 48 HOURS**.
- Residents/APPs should finish and forward all notes on same day.
- Check your **message center** at the start and end of each shift.

Procedural Sedation

- Use the **Procedural Sedation template** in our designated notes
- ED Physician Note, ED Addendum Note, & ED Procedure Note
- **Do NOT** use any other notes, templates, or personal macros.
- **Do NOT** change the title of the PowerNote.

THIS AND ONLY THIS

*Procedure M <Hide Structure> <Use Free Text>	
Procedure	
Type	US / Intubation / CVL / A-line / US PIV / Laceration Repair / I & D / Procedural Sedation / Lumbar
*Procedural Sedation	
Time	Date/time=== / Other
Confirmed correct	Patient, procedure / Time out / Other

Restraints

- Simply ensure that the restraints are ordered **within 1 hour** of the actual restraints being placed on the patient.
- The UED Restraint PowerPlan is being retired and the restraints can now be ordered as **individual orders**.

- Nonviolent Restraint Initiate and Monitor
- ~~UED Restraint~~
- Violent Restraint Initiate and Monitor

Opiate Prescriptions

- **Opiate prescriptions** should be limited to **# 12 tabs dispensed**.
- The total number of opiate prescriptions **does not matter**. Please continue to write opiates for patients that need them.
- Check your **prescription favorites** and adjust dispensed PRN.

Examples:

- Norco 1-tab TID x 4 days **#12 = PASS**
- Norco 1-tab BID x 6 days **#12 = PASS**
- Norco 2-tabs TID x 3 days **#18 = FAIL**
- Norco 1-tab TID x 5 days **#15 = FAIL**

Critical Care

- For **ESI level 1 and ICU patients**, consider whether CC time is justified and document it in the appropriate location of the note.
- Critical care time **is often missed** when sick patients are **signed out** shortly after the initial team has seen them.
- Remember to put CC time in the **ED Addendum** if applicable.

* Discharge plan	
* Critical Care Time	* === minutes (0 if none, otherwise 30 minutes minimum) / NOTES Impending deterioration: Airway / Respiratory / CV / Shock / CNS Interventions: IVFs / IV meds / ABX / Pressors / Blood products / Other: Reassessments / Labs/studies reviewed / Family / Consult
